

This assignment is going to need you to up on your technical thinking cap.

Attached to this assignment is a website that will list 20 Phone Interview Questions and answers.

From this list, choose 10 questions that you want to answer for this assignment. Feel free to write them down (and even answer them if you choose).

Using the Phone interview questions you choose from the step above, you will need to use your phone or Chromebook as a recording device. Speak the question and then answer the question. make sure you do this for all 10 questions.

Once you have completed this part, upload the sound file to this assignment. Also listen to the file a couple times yourself to understand what you sound like when answering these questions. It is a great tool to help you build confidence during the interview process.

If you are having troubles uploading the file, then simply just upload the questions you chose and the answers to those questions. Use the audio file as a tool for you to hear what you sound like.

Keep in Mind:

1. Energy and confidence
2. CLEAR, concise and articulate answers
3. Technical fit
